

# MIKROLAX GEL

## 3 tube (8g) za odrasle 3 tube (8g) za decu

**SRB MNE BIH****Sastav:**

Aqua, Sorbitol, Glycerin, Propylene Glycol, Carbomer, Triethanolamine, Propylparaben, Methylparaben.

**Šta je Mikrolax?**

Mikrolax gel je proizvod namenjen za rektalnu primenu. U pakovanju sadrži 3 tube po 8 grama gela formulisanog na bazi glicerola.

**Kako deluje glicerol?**

Glicerol kao emolijens omekšava, vlaži, smanjuje svrab i perutanje kože. Daje prijatan osćaj hlađenja, zbog čega se koristi kod različih iritacija na koži, praćenih neprijatnim tegobama.

Glicerol pomaže bržem zarastanju rana i drugih promena na koži. Ne izaziva iritacije i može se koristiti čak i za osetljivu kožu. Brzo se apsorbuje i ne ostavlja masne tragove.

Glicerol ima sposobnost da osmotski povlači vodu u lumen creva iz okolnih tkiva i dovodi do brže peristaltike creva i njihovog pražnjenja. Sadržaj creva time postaje mekši i crevna funkcija biva olakšana.

Može se koristiti kao priprema za ispitivanje, pre i posle operacija, kao i u stanjima koja iziskuju olakšano pražnjenje creva.

**Način upotrebe:**

Mikrolax deluje lokalno, i nema sistemskog delovanja nakon rektalne primene. U ležećem položaju, sadržaj tube istisnuti na ciljno mesto u rektum. Efekat nastupa nakon 15-30 minuta. Po potrebi postupak možete ponoviti još jednom u toku dana.

**Napomena:**

Preparat ne treba primenjivati kod akutnih hemoroidalnih upala praćenih hemoragijama, infekcijom i bolovima.

Mikrolax gel je pogodan za primenu kod povremene konstipacije, dok je u stanjima produženog zatvora potrebno konsultovati lekara.

**Način čuvanja:**

Na temperaturi do 22°C, van domaćaja dece.

**Rok upotrebe:**

3 godine. Datum proizvodnje sadržan je u serijskom broju utisnutom na varu tube i odštampan je i na kutiji.

**Pakovanje:**

Kutija sa 3 tube (8 g).

**Proizvođač:**

Esensa d.o.o., Viline vode bb, Beograd, Republika Srbija

**Zemlja porekla:** Republika Srbija

# MIKROLAX GEL

intim

## 3 tubes (8g) for adults 3 tubes (8g) for children

### **EN Composition:**

Aqua, Sorbitol, Glycerin, Propylene Glycol, Carbomer, Triethanolamine, Propylparaben, Methylparaben

### **What is Mikrolax?**

Mikrolax gel is a product intended for rectal application. The package contains 3 tubes with 8 grams of gel each. The gel is formulated on the basis of glycerol.

### **How does glycerin work?**

Glycerin acts as an emollient that softens, moistens, and reduces skin itching and flaking. It provides a pleasant feeling of cooling and therefore it is used for the treatment of various skin irritations which are accompanied by unpleasant difficulties. Glycerin helps to heal wounds and other changes on the skin. It does not cause irritation and can be used even on sensitive skin. It is quickly absorbed and doesn't leave a greasy residue. Due to glycerin's ability to osmotically draw water from surrounding tissues into the lumen of the intestine, it results in faster peristalsis of the intestines and their emptying. The intestine content becomes softer, and discharging the content becomes easier. It can be used as a preparation for examination purposes, it can be used before and after operations, as well as in conditions that require facilitated emptying of the bowels.

### **Instructions for use:**

Mikrolax acts locally, and has no systemic action following rectal administration. While in the supine position, squeeze out the

contents of the tube onto the target site in the rectum. The effect occurs after 15-30 minutes. If necessary, you can repeat the procedure once more during the course of the day.

### **Note:**

The preparation should not be used in acute hemorrhoidal infections accompanied by hemorrhage, infection, and pain. Mikrolax gel is suitable for use in cases of occasional constipation, whereas in conditions of prolonged constipation it is necessary to consult a doctor.

### **Storage conditions:**

Store at temperatures up to 22°C, away from the reach of children.

### **Expiry date:**

3 years from the date of manufacture. The date of manufacture is contained in the serial number imprinted on the weld of the tube and printed on the box.

### **Packaging:**

A box containing 3 tubes (8 g).

### **Manufacturer:**

Esensa d.o.o., Viline vode bb,  
Belgrade, Republic of Serbia

### **Country of origin:**

Republic of Serbia
