

FERIMED

elixir with iron, zinc and honey

STRONG AND RESILIENT, HEALTHY AND BRAVE

200ml

Dietary supplement

Active ingredient:	100 g of product contain:	5 ml (5,5g) of product contain	% NRVI* in 5ml(5.5g)of product	10 ml (11g)of product contain	%NRV* in 10ml(11g)of product
Iron (iron(III)-pyrophosphate)	132 mg	7.25 mg	52	14.5 mg	104
Zinc (zinc oxide)	54.5 mg	3 mg	30	6 mg	60

NRV* - Nutrient Reference Value

Ingredients: purified water; thickener-glycerol; honey; Sunactive Fe-P80 LK (iron (III)- pyrophosphate, emulsifier - lecithin, sodium chloride, maltodextrin); emulsifier: microcrystalline cellulose and sodium carboxymethylcellulose; Sunactive Zn-P240 (zinc oxide, emulsifier-polyglycerol fatty acid ester, enzymatically hydrolysed lecithin, maltodextrin, water); aroma; preservative-potassium sorbate; thickener-xanthan gum; citric acid; color- beta carotene.

Nutritional information:	100 g of product contain on average:	5 ml (5.5 g) of product contain on average
Energy value (kJ/kcal)	1609.2/378.6	88.51/20.82
Carbohydrates (g) - of which sugars (g)	94.3 2.2	5.19 0.12
Fats (g) - of which saturated fatty acids (g)	<0.1 <0.1	<0.01 <0.01
Proteins (g)	0.36	0.02
Salt (g)	0.2	0.01

Why is iron important for everyone and especially for the youngest?

Anaemia is most commonly caused by iron deficiency especially in children. That type of anaemia is called sideropenic anaemia i.e. anaemia caused by reduced iron incorporation into erythrocytes (red blood cells). The most common cause of sideropenic anaemia is inadequate diet, when there is an imbalance between the needs of the organism and the possibility of iron intake through food . Symptoms of anemia are fatigue, nausea, paleness, fainting, headache, dizziness, irregular heartbeat, chest pain, cold hands and feet, lack of breath, although anemia often occurs without visible symptoms. In these cases, it is necessary for the organism to compensate for iron with good quality preparations that contain it in sufficient quantity and optimal form.

Why is zinc important?

Zinc is an essential mineral which is the integral part of a large number of proteins and, therefore, it is very important for growth and development. It participates in almost all biochemical and physiological processes, and its deficiency in the body negatively influences wound healing, the normal functioning of the immune system, the duration of symptoms of a cold, and the general state of the organism.

Is FeriMed the right choice?

FeriMed elixir with iron, zinc and honey is formulated on the basis of innovative technology which was initially developed in Japan. Iron and zinc are incorporated in lysosomes, ultra fine particles which allows the suspending of these two active principles in the liquid medium without precipitation formation, as well as a number of other advantages relative to the classical compositions.

The advantages of administration of liposomal form:

- greater bio-usability and constant release of active principles
 - significantly reduced irritation of the gastrointestinal tract
 - no metal taste after use
 - no discoloration of the product
 - stability to heat, pH, oxygen, salts
 - safely applied in children and adults
-
- ✓ Iron and zinc have a role in the cell division process, contributing to normal immune function, normal cognitive function
 - ✓ Iron contributes to the normal formation of red blood cells and hemoglobin, the normal transport of oxygen in the blood.

Dosage and method of use:

Children from 3-12 years of age: 5 ml (1 teaspoon) 1-2 times daily, with recommendation by a physician or pharmacist.

FeriMed elixir can be mixed with water or juice. Elixir is best taken during or immediately after meals. Shake before use.

Notes:

Dietary supplements are not a substitute for a varied and balanced diet, or a healthy lifestyle. Recommended daily intake must not be exceeded. Keep it out of reach of children.

Warning: Not recommended for persons oversensitive to any of the product's ingredients. Do not use after the expiration date.

Storage:

Store in original packaging, in a dry and dark place, at temperature up to 30°C. Close the vial well after each use.

Shelf life: 3 years

Manufacturer: ESENSA d.o.o., Viline vode St.bb (no number), Republic of Serbia
