- of which sugars (g)	0.42	0.08
Proteins (g)	0.20	0.04
Salt (g)	0.053	0.01

Effects:

Timal product unifies herbal extracts which facilitate expectoration and help regenerate damaged airway mucosa.

Thyme stimulates the secretory activity of airway epithelial cell cilia, facilitates expectoration of accumulated mucus and exhibits antimicrobial activity. Primrose is a medicinal herb which due to its composition, has the ability to break up thick bronchial mucus, accelerates the excretion of mucus from

the bronchi and facilitates breathing and expectoration. Primrose extract also has an antiseptic effect and can reduce inflammations of the oral and pharyngeal mucosa.

Basil is a medicinal herb which, due to its aromatic eugenol oil, is traditionally used for alleviating airway mucosa inflammations.

Rose hip is a rich and essential source of vitamin C, which is indispensable for the body's immune system.

Dosage and instructions for use:

Adults: 3 times a day 1 tablespoon (15 ml).

Children over 12 years of age: 3 times a day 1 teaspoon (5 ml).

Shake before use.

The product should be used for 5 – 7 days. If the health conditions do not improve during that period, seek for a medical advice.

Notes:

Dietary supplement is not a replacement for a healthy and balanced nutrition.

Recommended daily dose must not be exceeded.

Special warnings:

Do not use the product after its expiry date.

The product is not recommended for persons sensitive to the product ingredients, small children, nor for pregnant or breastfeeding women.

Disturbances in functioning of the gastrointestinal tract can occur (nausea, vomiting, diarrhea) and hypersensitivity reactions.

The product contains ethanol.

Simultaneous use with antitussives is not recommended.

Excessive use may cause a laxative effect.

Net quantity: 200 ml

Shelf life: 3 years

Storage:

The product should be stored at room temperature (up to 25°C), in a dry and dark place, out of reach of children.

Close the bottle tightly after each use.
