

**EN** **Khan massager gel-cream** is formulated on the basis of ingredients traditionally used to help with degenerative and inflammatory diseases of joints and muscles. It is recommended for combating rheumatic problems, lumbago, neuralgia and stiffness. Application using the massager enables a faster and improved effect of the active components. Massaging enhances blood and lymph circulation, which accelerates the absorption and action of the gel locally, on areas that are in pain, and thus accelerates the recovery process.

If applied to the area of sore and tense muscles, Khan massager gel-cream allows for relaxation, and can also be used to combat sprains, strains and dislocations brought on by sports or recreational activities.

**Helps with:** pain, rheumatic problems, slow peripheral circulation and sports injuries.

**Warnings:** For external use only. Avoid contact with the eyes, mucous membranes or damaged skin. In case contact does occur, rinse immediately with water. Not recommended for people hypersensitive to any of the ingredients in the product. Keep out of reach of children.

**Instructions for use:** After removing the cap, turn the top of the tube from the off position to the on position. Squeeze the gel-cream onto the desired part of the skin of the body and rub the product in using circular movements with the help of the massage balls on the top of the tube until the gel-cream is completely absorbed.

**Storage conditions:** Store at temperatures up to 25°C, out of the reach of children.

**Packaging:** 200 ml of gel-cream in a tube with a massager.

**Expiry date:** 3 years from the date of manufacture. The date of manufacture is contained in the serial number imprinted on the weld of the tube and printed on the box.
