

BURJA® BB cream is a multi-purpose product that combines skin care and skin protection in just one step, while achieving perfect coverage of imperfections. It is formulated on the basis of innovative encapsulated pigments that are activated by rubbing on the surface of the skin, thus achieving a uniform complexion, in a weightless fashion, without the feeling of having a mask on your face.

The encapsulated pigments are incorporated into the foundation of the cream, which hydrates and nourishes the skin, so that a natural and radiant appearance of the skin is achieved immediately, and which lasts throughout the day.

The photoprotective filters in **BURJA® BB cream** protect the skin from the effects of UV rays. The combination of mineral and organic filters in the cream provides skin protection on the level of SPF10.

BURJA® BB cream:

- ✓ **Perfectly covers imperfections and evens out skin complexion**
- ✓ **Hydrates the skin and protects it from UV rays**
- ✓ **Reduces the visibility of pores**
- ✓ **Light, non-greasy texture**
- ✓ **Noncomedogenic**
- ✓ **Odorless and paraben free**
- ✓ **For all skin types**

Instructions for use: Apply the cream evenly in a circular motion on previously cleansed skin. Thanks to the encapsulated pigments, the cream gradually changes color to perfectly adapt to your complexion.

Warnings: For external use only. Keep out of reach of children.

Storage conditions: Store at temperatures below 30°C.

Expiry date: 3 years from the date of manufacture.

The manufacturing date is contained in the serial number imprinted on the weld of the tube and printed on the box.
