

MARISOL

HYPERTONICA 3%, STERILE, 5 ML

sterile solution of sodium chloride 3%

Purpose of use:

marisol hypertonica 3%, sterile, 5 ml in single dose, preservative-free, sprayable spray, acts through various mechanisms that facilitate the breakdown of respiratory secretions and improve breathing by:

- Breakage of ionic bonds in the mucus gel, thereby reducing the viscosity and elastic secretion
- Absorption of water from mucous membranes and submucosa, thus reducing the swelling of the respiratory tract walls
- Cough and sputum stimulation, which can help eliminate mucus from the bronchi and during obstruction of the respiratory tract

Marisol hypertonica 3%, sterile, 5 ml in inhalation therapy is specifically indicated for patients of all age groups suffering from bronchiolitis, acute bronchitis, cystic fibrosis and chronic obstructive pulmonary disease (COPD). It can also be used as an adjunct to other inhalation products.

Instructions for use:

It can be used with any type of nebulizer or inhaler. It is recommended that you follow the manufacturer's instructions for use.

Use 4 or 5 ml solution for inhaled therapy or as prescribed by your doctor.

Precautions:

- ✓ Keep out of reach of children.
- ✓ This product does not contain preservatives. After opening the ampoule, use the contents immediately and discard after use to avoid the risk of contamination or any infection.
- ✓ Do not use the product with other medicines before checking with your doctor.
- ✓ For very sensitive patients, the product should be administered according to a doctor's prescription, as prior administration of a bronchodilator may be required.
- ✓ In case of bronchospasm or persistent cough, discontinue therapy and consult your doctor.
- ✓ Do not use the product after its expiry date.
- ✓ Do not store the product at temperatures above 25°C.

Composition: sterile solution of sodium chloride 3%
